Job Bank

Responsibilities:

1. Provide technical support to end-users in a timely and professional manner, resolving hardware and software issues related to desktops, laptops, printers, and other peripherals.
2. Install, configure, and maintain desktop hardware and software components, ensuring compatibility with the organization's systems and security policies.
3. Diagnose and troubleshoot network connectivity issues, including LAN, WAN, and wireless networks, in collaboration with the network team.
4. Collaborate with the IT team to deploy and maintain desktop operating systems, patches, and software updates.
5. Assist in managing user accounts, permissions, and access rights within

Active Directory and other relevant systems.

6. Educate and train end-users on the proper use of hardware, software, and applications, promoting best practices and ensuring optimal system performance.
7. Document technical procedures, guidelines, and knowledge base articles to enhance the resolution process and improve efficiency.
8. Participate in technology projects and initiatives, providing technical expertise and contributing to the successful implementation of new systems and technologies.
9. Ensure compliance with IT security policies, procedures, and standards, taking proactive measures to safeguard confidential information and prevent data breaches.
10. Collaborate with third-party vendors and service providers for procurement, repairs, and warranty claims related to desktop equipment and peripherals.

Skills and Qualifications:

- Bachelor's degree in Computer Science, Information Technology, or a related field.
- Strong knowledge of desktop hardware, operating systems (Windows, macOS), and software applications.
- Experience with troubleshooting and resolving desktop hardware and software issues.
- Familiarity with network protocols, LAN/WAN technologies, and wireless networking.
- Proficiency in Active Directory administration and user management.
- Excellent interpersonal and communication skills, with the ability to effectively communicate technical concepts to non-technical users.
- Strong analytical and problem-solving abilities to diagnose and resolve complex technical issues.
- Detail-oriented with exceptional organizational and time management skills.
- Ability to work independently and collaborate effectively within a team environment.
- Relevant certifications such as CompTIA A+, Microsoft Certified Desktop Support Technician (MCDST), or similar certifications are a plus.
