### Description

## Wipro Recruitment 2023

The Data Engineer is responsible for designing, developing, and maintaining data pipelines and systems that enable Wipro to collect, store, process, and analyze data at scale. This position requires a strong understanding of data engineering principles and practices, as well as experience with cloud computing platforms and big data technologies.

### Wipro Careers

#### Responsibilities:

- Design, develop, and maintain data pipelines and systems that enable Wipro to collect, store, process, and analyze data at scale.
- Work with stakeholders to understand data requirements and develop solutions that meet those needs.
- Deploy and manage data pipelines and systems in the cloud.
- Monitor and optimize data pipelines and systems for performance and scalability.
- Collaborate with other data engineers and data scientists to develop and implement data solutions.
